

# **GENEVA MIDCAP EVENT**

Can a

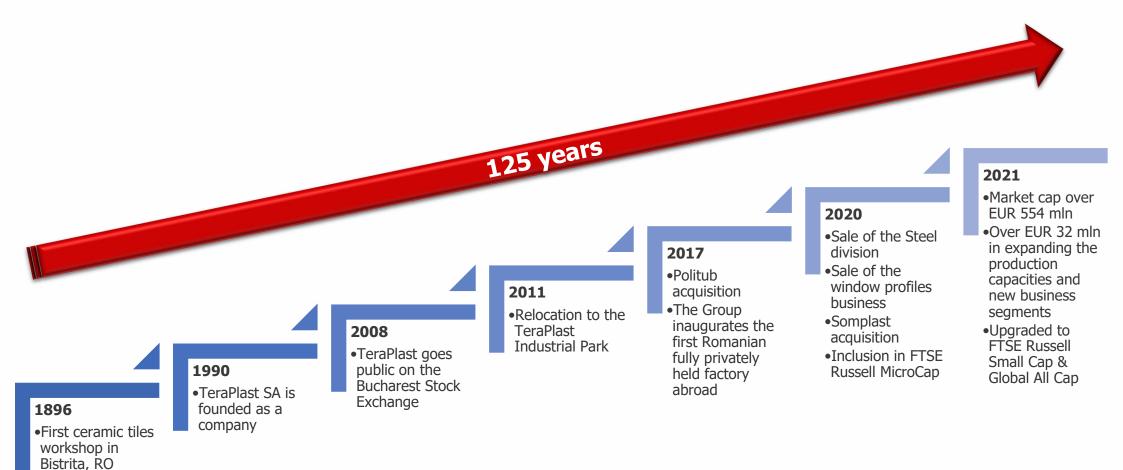

December 1-2, 2021

- > TeraPlast: a high-performance company
- > 2020-2021: shift in strategy
- > An ambitious view of the future
- > Conclusions

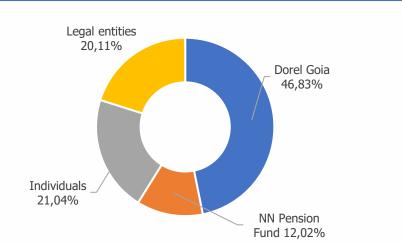

TeraPlast Group is one of the largest Romanian entrepreneurial groups with 125 years of tradition, extensive expertise in polymer processing industry and an annual turnover of over EUR 100 million. The Group has a proven track record of solid growth and innovation.

- > Controlling shareholder: Mr. Dorel Goia, also Chairman of the Board
- We have **performed during 3Q21**, with +43% in turnover, +30% in EBITDA and +39% in net profit
- > We are **one of the best-performing stocks from the BET index** in the last 12 months (+207%)
- Market capitalization (26.11.2021): EUR 467 mln
- We granted **1 free share per each 4 shares held** → ex date 28.09.2021
- We consistently invest in our development: EUR 32 million in 2021 in the expansion of our production capacities and new business lines → 3 projects co-financed through state aid which is worth EUR 14 mln in total.
- So far, the investment projects that offer **sustainable solutions** amount to **EUR 20 million in total**.
- > We have adapted to **cushion or cancel various shocks in the market** – raw materials, energy, construction materials' prices etc.

## Trading volume & market cap evolution – TRP, last 12M

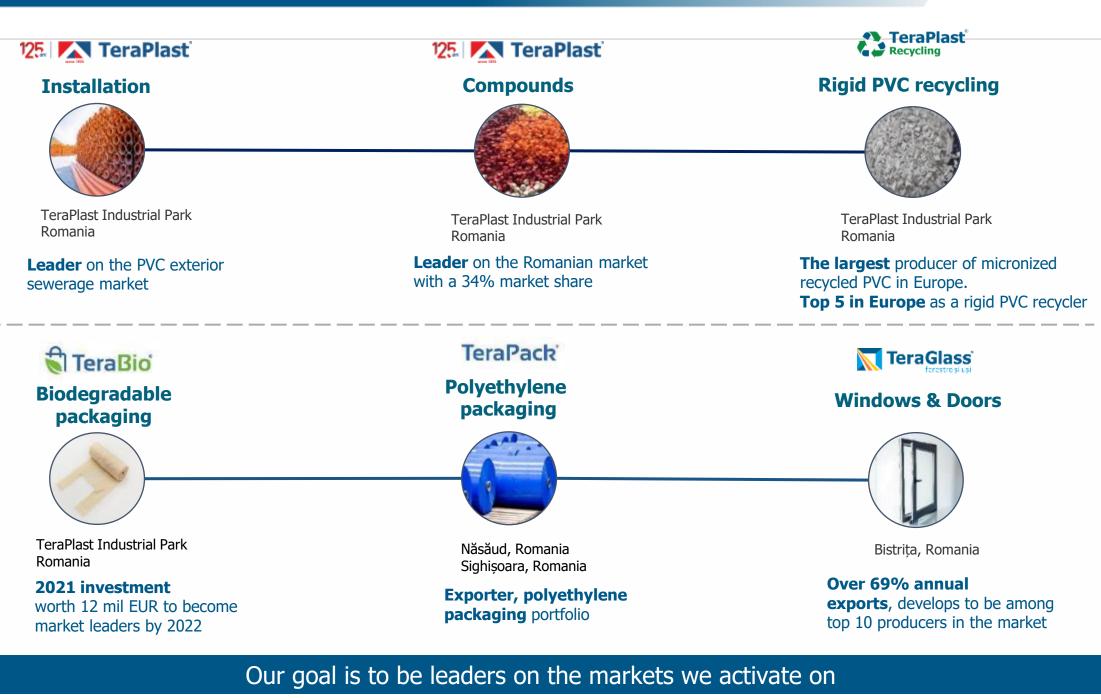

125 TeraPlast	<ul> <li>Leader of the Romanian exterior sewerage market and PVC compounds market in Romania, on BSE since 2008.</li> <li>2021 investment plan: EUR 20 mln in expanding the production capacities for interior sewerage, PE-Xa systems and water &amp; gas systems</li> <li>Processing capacities of 96.000to of polymers – LEADERS IN CENTRAL &amp; EASTERN EUROPE</li> </ul>
TeraPlast Recycling TRP stake: 99%	<ul> <li>Rigid PVC recycler (post-industrial &amp; post consumer)</li> <li>Processing capacity of 31.000 tons</li> <li>The largest producer of recycled micronized PVC in Europe and among top 5 European rigid PVC recyclers</li> </ul>
TeraBio TeraPack TRP stake: 100%	<ul> <li>Biodegradable films and bags producer   Polyethylene films producer</li> <li>We invest EUR 12mln in 2021 in the new biodegradables factory, in equipment and state-of-the-art technology that represent a production capacity of 5.000 t/year</li> <li>Integrates the polyethylene packaging production &amp; recycling from Somplast and Brikston Construction Solutions. Total polyethylene films production capacity: 5.000 t/year</li> </ul>
TeraGlass Forestre și uși TRP stake: 100%	<ul> <li>PVC and Aluminum windows &amp; doors producer</li> <li>Over 15 years of experience on the market</li> <li>69% of its turnover is exported to Germany, Austria, Czech Rep., Slovakia, Hungary, Slovenia</li> </ul>
<b>SOMPLAST</b> TRP stake: 70%	<ul> <li>Stake acquired in December 2020. Taken over at the end of April 2021.</li> <li>Main activity: real estate management of the Nasaud production site, where TeraPlast Recycling and part of TeraBio Pack carry out their activity.</li> </ul>

## Market leader on multiple segments

## **Business model snapshot**

www.teraplast.ro

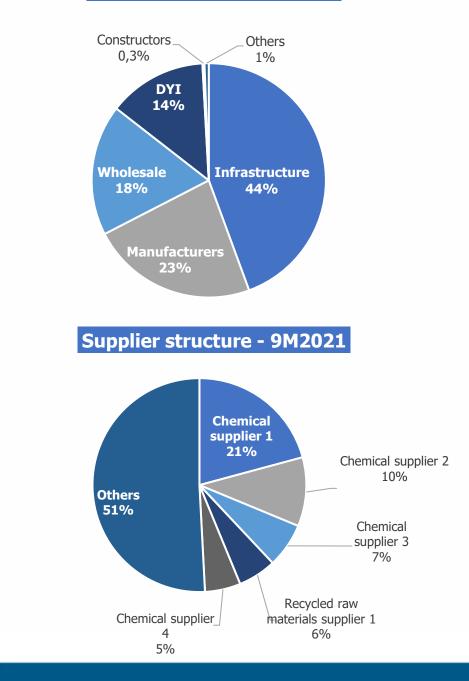

The Group has good reputation among its clients and suppliers being recognized as a trustworthy, strategic business partner

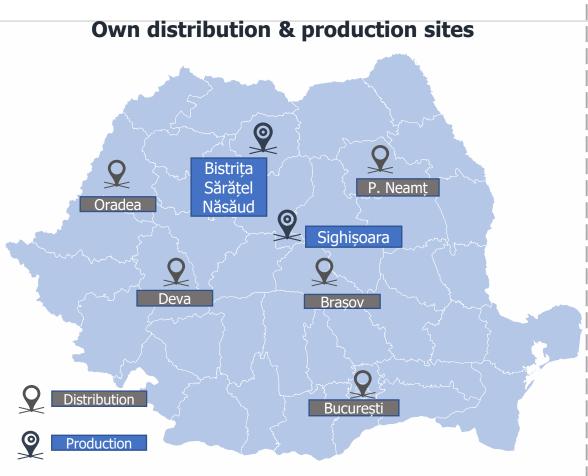

- > Tight credit risk monitoring internal & external (insurance)
- > Effective purchasing policy: broad supplier base
- Low dependence through client
- Cost-effective production processes
- Good cash management

125 KaraPlast

- Experienced management team
- Diversified portfolio of products & market segments
- Good margins thanks to Group size and innovation
- Customized strategies for each company and market segment
- ➤ Flexibility and strategic management → niche strategies and costs leadership
- $\succ$  Not exposed to the public sector but linked to some extent

### Client structure - 9M 2021

## Four production sites: Bistrița, Sărățel, Năsăud, Sighișoara

The production activity is backed by the 6 own distribution centers and the large distribution network.

## **Expansion works**

### The total production surface of the Group:

- Total surface: 323.223m2
  - Construction: 89.240 m2 (production and storage halls)
  - Concrete platforms: 131.389m2

## Out of which:

- 4.440 m2 for the biodegradable packaging factory in 2021
- 4.944 m2 of storage space in 2021
- 4.410 m2 for the new PE factory until March 2022

TeraPlast Group is **one of the largest Romanian entrepreneurial groups with 125 years of tradition** and a proven track record of innovation and development in the polymer processing field.

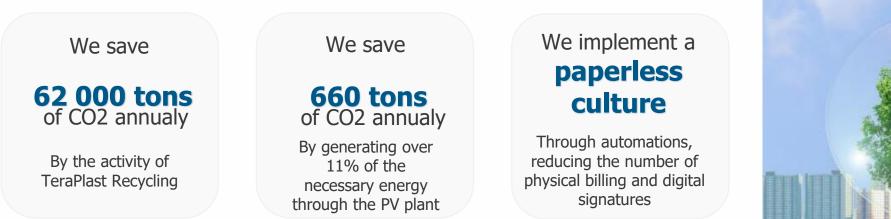

Our mission is to develop **efficient solutions for people and the environment** through innovation and adaptability.

Our vision is to **be leaders on the markets we activate on** by offering high-quality, internationally-certified Romanian products and through developing long term, strong partnerships. Our values are **Tradition**, **Responsibility and Performance**.

TeraPlast Group has 125 years of tradition among which we innovated & reinvented ourselves, successfully adapting to the market context and overcoming any obstacle. During these years, we built a powerful brand and an efficient business model, we developed a united team and built strong partnerships. We promote a sustainable business where we take responsibility of our actions on medium and long term. Both inside and outside our organization we show a responsible behavior to the economic and social areas that we activate on, and we permanently seek solutions to protect the environment. Our ambition is to reach performance at every level in everything we do. We study the market, anticipate, set high objectives and we are competitive. We use state of the art equipment and advanced technology and permanently invest in development and motivation programs.

# A responsible company, dedicated to sustainability (1/5)

www.teraplast.ro

- > We implement best practices in corporate governance to increase our competitivity on the capital market and bring value to our shareholders and employees.
- > We permanently monitor the performance of our product portfolio and recipe development; we launch new, improved solutions.
- Active community involvement though the CSR platform *Building Romania Together* in 3 main areas: Education, Social, Health&Environment.

The CO2 saving are the equivalent of the annual carbon footprint of almost 16.000 people.

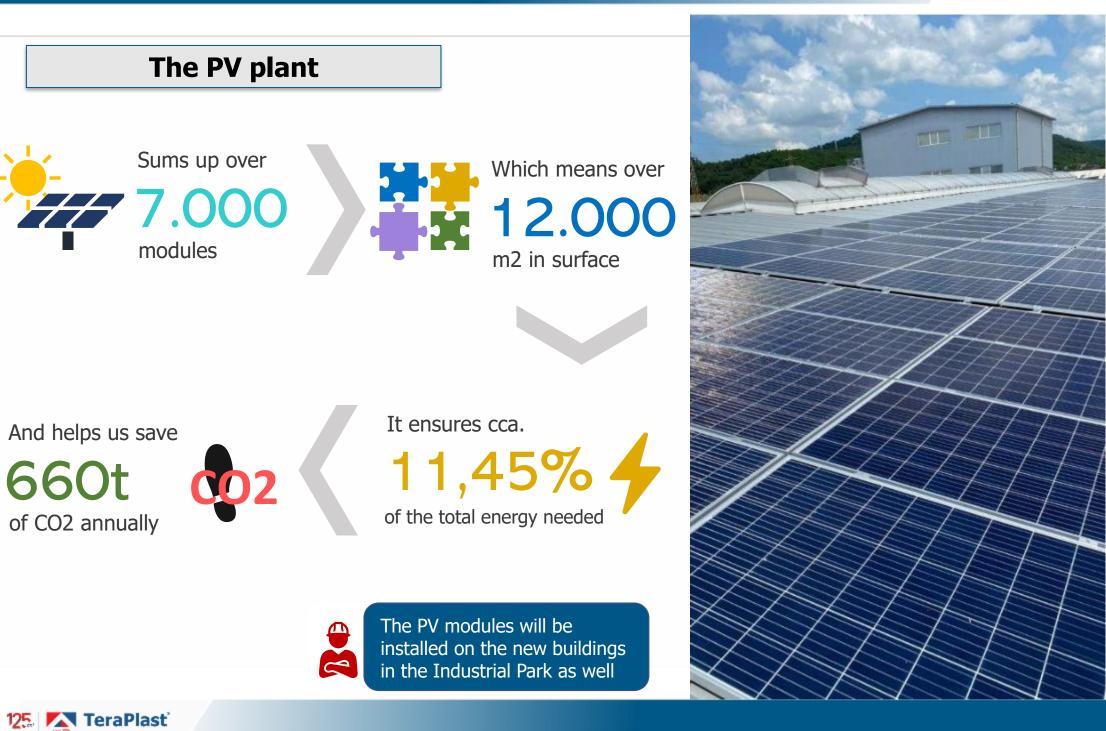

A responsible company, dedicated to sustainability (2/5)

www.teraplast.ro

# A responsible company, dedicated to sustainability (3/5)

www.teraplast.ro

# **Digital transformation**

We take advantage of digitalization to optimize our production processes, to intensify our customer relations & create efficient sales and administrative structures.

ERP multi-module systems: Warehouse Management System, SAP 4 Hana, electronic invoicing system

RPA (robotics process automation by UI Path) for credit controlling, payments & cash bookings

Production planning tool -Advanced Planning System

Paperless culture: digital signature, electronic archiving & tablets integrated with SAP for personnel responsible for stock movements

Business Intelligence tools: QlikView, capable of extensive data personalization converting raw data into knowledge

# **Community & Product development**

We support sports activities like the local handball team, tennis and running competitions.

We are involved in a dualeducation program with a local high school.

We support the reward of the academic performance of the children from disadvantaged areas.

·

We participate in reforestation initiatives together with a local NGO and support Via Transilvanica – a Romanian El Camino.

We have implemented a whistleblowing program for our employees & partners.

We constantly improve our portfolio: biodegradable packaging, PE 100-RC pipes, using recycled PVC in producing PVC pipes.

- > We have industry-specialized colleagues that carry out the **internalized R&D activity**.
- > We also have an **internal testing laboratory**, accredited by RENAR the national Accreditation Body.
- Through the R&D activity, TeraPlast marked a series of premieres in terms of uniqueness and innovation:
  - First producer of certified polyethylene piping in Romania and the first producer of multilayered PVC pipes for exterior sewerage
  - First Romanian producer of sandwich panels manufactured on a continuous line by a Romanian company (TeraSteel)
  - The only producer in Romania with a patent to produce multilayered PVC pipes for exterior sewerage (with recycled PVC core)
  - The only producer in Romania of HFFR compounds (halogen free, fire resistant)

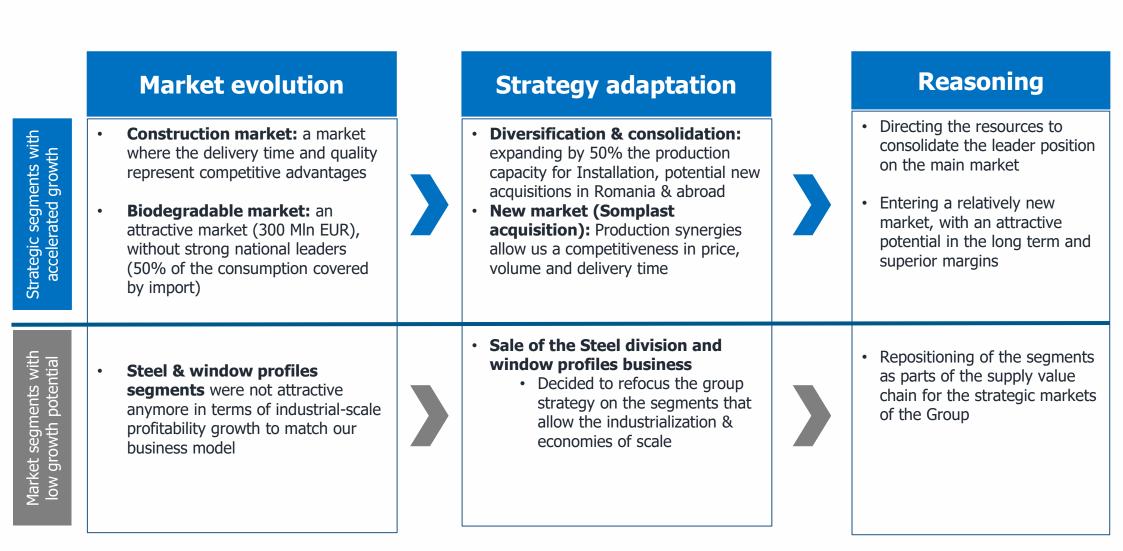

# 2020-2021: shift in strategy

2020 - the year when TeraPlast Group had the best results and adapted its strategy to benefit from the new market opportunities in the long-term starting 2021 by commiting to become the largest polymer processor in Central & Eastern Europe\*

\*excluding Poland

Values registered by the businesses in the current structure of the Group, excluding the impact of the Steel division and window profiles transactions.

125 🔼 TeraPlasť

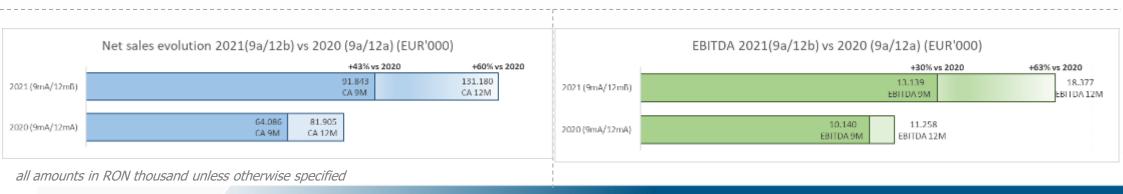

The results of the Installation business line (TeraPlast) were influenced by raw material costs and a change in demand in a market in search of a new trend. Disturbances were observed mainly due to the extended period of implementation of the indexation of construction materials prices in ongoing public procurement contracts and due to the non-correlation of cost standards at open / launched tenders during this period with the new market realities.

- Compounds (TeraPlast) remains the business line with accelerating performance, including compared to previous quarters, and the EBITDA margin of the Windows & Doors business line (TeraGlass) keeps improving.
- The performance of the Flexible packaging business line (TeraBio Pack) was affected in the third quarter by some delays in the commissioning of the biodegradable packaging factory. The segment includes the polyethylene film businesses taken over from Somplast and Brikston, which require an efficiency of operations, including the construction of a new production infrastructure.

### 1 Revenue from Steel & Profiles sale

Capital investments

Of the total ongoing investments (RON

by the end of last year. The remaining

amount will be financed by bridge loans

153m), 83m were paid in the first 9 months

of 2021 and approximately 10m were paid

that will be reimbursed after receiving state

2

aid.

The collection from the transaction had the following destinations:

- dividend payment (57%);
- acquisition of fixed assets (21%);
- loan payments (13%);
- the impact of taking over Somplast's net assets at the date of consolidation (5%);
- the rest was used to finance operating activities

#### 3 Loans

TFD / EBITDA (ttm) decreased from 2.3x in 2020 to 1.2x in 2021. This level will increase with the contracting of bridge loans for the completion of the investment plan and will return to approximately the same level after the collection of state aid (approximately 70 million RON).

#### Net cash for operation

4

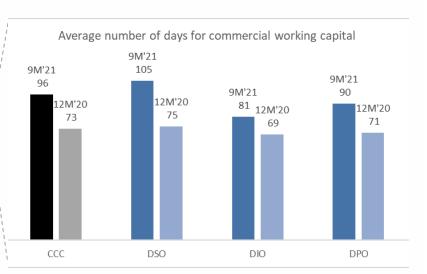

The main reason for the deficit in operating activity refers to the increase of the cash conversion cycle from 73 to 96 days (with an impact of approximately RON 77 million in 2021). The increase in CCC is mainly due to the 40% increase in DSO which was partially covered by the 27% increase in PDO. The increase in DIO was 17%.

Equity	119,3m	68,1m	51,2m	75%

#### Trade NWC

- DSO is impacted by price increases throughout the year;
- Customer financing is a differentiating factor, allowed by the contracted insurance conditions;
- We do not have significant delays, the monitoring process is continuous;
- The group's receivables are insured in proportion of 60%;
- Diversified client portfolio, the largest exposure represents 5% of total receivables and top 3 exposures represent 8.5% of receivables
- DIO and DPO aggressive procurement policy to ensure the necessary stock;

#### Net debt / EBITDA ttm

- From the collection related to the transaction, the Group used approximately RON 50m for the payment of loans;
- This multiple will increase towards the end of the year and until the completion of the implementation of state aid projects and will return to this level after receiving state aid;
- The group thus has a debt capacity of approximately RON 125m;

# An ambitious view of the future

	2021/22 Objectives	Development plan
We continue our development through both investment and M&A	Consolidating or reaching the first position on the Group's segments active on the construction market	<ul> <li>We actively study acquisition opportunities in Romania and abroad</li> <li>Completion of the production capacity expansion for the Installation business</li> </ul>
	Leader on the packaging market	• We invest EUR 12 mln in TeraBio Pack which means an added production capacity of 5.000 tons/year on this segment
	TeraGlass among top 10 windows & doors producers in Romania	Acceleration of the turnover and profitability increase
	An equilibrated capital allocation policy	<ul> <li>The net profit from the sale of the Steel division was directed to dividends worth EUR 46 mln in total and share capital increase by EUR 8,9 mln in total &amp; towards the development of the group's businesses</li> </ul>
	EBITDA objective EUR 26,6 mln	The sustainable and profitable increase of the Group turnover
	We will create 200 jobs	As a result of the expansion projects already in implementation

		Market wise		Business wise
Implementing our strategy	•	The continuous pandemic context could restore the market uncertainty and can bring up problems in the logistic chain	•	The most abrupt raw material price increase in the last 5 years that accelerates the recycling investments
implies a series of <b>risks</b> and challenges	•	On POIM (Large Infrastructure Operational Program) Romania still has EUR 6 bln to spend in the next 2 years	•	We implement productive projects worth EUR 32 mln
	•	The start of the National Resilience and Recovery Program brings additional budget for investment where our group can provide products	•	We create 200 new jobs

125 KaraPlasť

 $\rightarrow$  The growth in 2021 is based on:

- Increase in production capacities for TeraPlast by implementing the state aid co-financed projects
- Starting up the production of TeraBio Pack and integration of Somplast

The results from 2020 and the first half of 2021 highlight the profitability of the accelerated growth business model and reconfirm the development strategy of the TeraPlast Group on the markets it targets the leading position.

### **EBITDA Bridge 2019 – 2021**

TeraPlast, Plastics Division

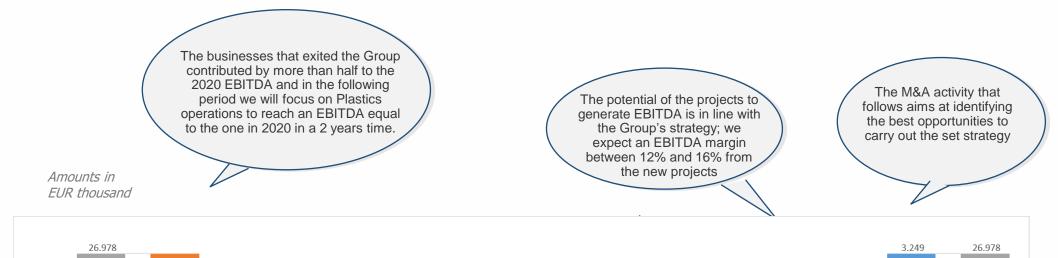

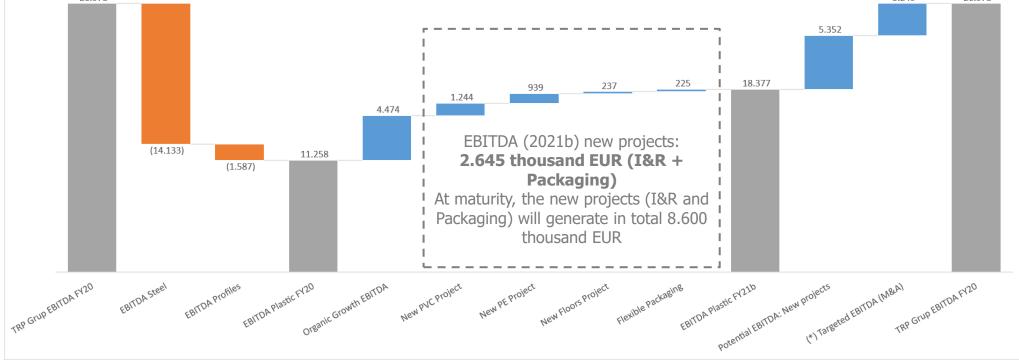

### **KEY POINTS**

### **Plastics division**

- Sustained profitability despite the crisis;
- Low maintenance capex (EUR 1 mln/year due to use of latest technology).
- EBITDA Margin of 13,7% for the plastics division is superior to Group average of 12%, prior the Steel division exit.
- The budgeted growth does not include potential M&As.

(\*) excluding Somplast's contribution

## TeraPlast: a company with outstanding performance on both the polymer products market and the capital market.

2

The group aims the development of the business through both investment, accelerated organic growth in the favorable market context, and through M&A. We have long-term partnerships in the areas of raw materials and utilities, and a global footprint in supplier base that gives us a certain comfort in negotiating in abnormal market conditions. We have also approached a different inventory management model compared to last year to dampen the impact of raw materials price fluctuation.

125. 🚺 TeraPlast

2020 was the year with the best results for TeraPlast Group and we managed to surprass them by Q3/2021, delivering on our promise to grow by double-digits.

4 StartingQ4/2021 we will have into operation the production capacities of the 2021 investments which will help us manage better the off-season.

The outlook for 2022 is positive on all segments, from installation and windows & doors (PNRR), to packaging (European directives) and recycling (Green Deal).

6

In 2022 we will rebuild the EBITDA of EUR 26 million, prior to the sale of the Steel division and window profiles, and our commercial efforts will be directed towards consolidating or achieving market leader positions, depending on the segment.
